

Heat Island Data Analysis

Name _____ Period _____

Use our data from yesterday's experiment to answer the questions and create a graphic to show your findings.

1. Did the data show what you would expect?
2. How could this change at different times of day?/ Seasons?
3. What would you do differently next time? The same?
4. **How does temperature change when you add water or plants to a system? (e.g. Mansfeld pond) Why?**

Your graph/picture showing your findings:

(examples: bar graph, line graph, temperature map, etc.)
